

Remote Work Policy – Global
Effective Date: March 15, 2025
Owner: People Operations

1. General Eligibility

- 1.1 Employees who have completed at least 30 days of employment and are in good standing (no active performance improvement plans) are eligible to request remote work arrangements.
- 1.2 Roles that require physical presence – such as facilities management, laboratory technicians, and security personnel – are not eligible for regular remote work but may request ad-hoc exceptions with VP approval.
- 1.3 All remote work requests must be submitted through the HR portal at least 5 business days in advance for intermittent remote days, or 30 days in advance for full-time remote status.

2. Remote Work Frequency and Duration

- 2.1 Most employees may work remotely up to 3 days per calendar week without special approval. The remaining 2 days must be spent in the office unless otherwise agreed with the direct manager.
- 2.2 Fully remote arrangements (working from home 5 days per week) require written approval from the Department Head and HR Business Partner, and are typically granted only for documented medical reasons, family caregiving situations, or roles that have been designated as remote-first.
- 2.3 Temporary remote work from a location outside the employee's home country is permitted for up to 10 business days per calendar year, provided the employee notifies both HR and IT at least 14 days in advance. The employee is responsible for understanding and complying with local tax, immigration, and labor laws.

3. Technical and Security Requirements While Remote

- 3.1 When working remotely, employees must use the Company-provided VPN (Virtual Private Network) for all access to internal systems, including email, file shares, and any applications that contain customer or confidential data.
- 3.2 Connecting to public Wi-Fi networks (e.g., coffee shops, airports, hotels) is prohibited unless the employee also uses a company-issued mobile hotspot. Personal mobile hotspot usage is permitted only if the employee's personal device is not used for any work-related data processing.
- 3.3 The Company laptop must be the primary device for all work activities. No work-related data – including emails, documents, or spreadsheets – may be saved to personal cloud storage accounts (e.g., iCloud, Google Photos, personal OneDrive).

4. Manager Responsibilities

- 4.1 Managers approving remote work must ensure that team collaboration and productivity are not negatively impacted. This includes establishing clear communication norms (e.g., daily stand-up calls, Slack response time expectations) and checking in with remote employees at least twice per week.

4.2 Managers may revoke remote work privileges at any time if an employee fails to meet performance expectations, misses deadlines without communication, or violates any security or data handling policies.

5. Compliance and Enforcement

5.1 The IT department may audit remote connections, VPN logs, and device compliance status at any time without prior notice to ensure security requirements are being followed.

5.2 Employees found to be working from prohibited locations (e.g., sanctioned countries, unapproved international locations) will be subject to immediate suspension of remote work privileges and a formal written warning.

5.3 Repeated violations of this policy may result in a requirement to work fully onsite for a period of 90 days, after which remote eligibility may be reconsidered.
